Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3632

This is the second office action for the serial number 10/805,698, BOOM DEVICE FOR PRESENTATION APPLIANCES, filed on 3/22/04.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Newly submitted claims 12-22 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 2-4 and 6-11, drawn to screen, classified in class 248, subclass 123.2.
- II. Claims 12-22, drawn to presentation board, classified in class 353, subclass 79.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case invention group I has separate utility such as displaying screen which is feed by computer or television. See MPEP 806.05 (d).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 12-22 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Art Unit: 3632

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-4 and 6-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2, line 7, “the projector” is indefinite because it cites combination/subcombination problem. “The projector” is not being positively cited in body of claim 2.

Claim 3, lines 2-3, “the projector” is indefinite because it cites combination/subcombination problem. “The projector” is not being positively cited in body of claim 2.

Claims 3-4 and 6-11 are rejected as depending on rejected claim 2.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3632

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2-4, 6 and 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by
US Patent # 6,736,516 to Francis Kepley, Jr. et al.

Francis Kepley, Jr. et al. teaches a support stand apparatus (figure 2) comprising a first set of upright members (102 and 104) adapted to support a screen (112), a second set of upright members (134) adapted to support a projector (120). The first set of upright members are positioned between the second set of upright members and a support location of the projector. The apparatus comprises a boom arm (124) movably attached to the second set of upright members and wherein one end of the boom arm supports the projector. The boom arm also supports a weight (140 and 204) communicating only with the boom arm. The weight is positioned to counterbalance the projector about the second set of upright members. The boom arm also supports a free-hanging weight (140) attached to the boom arm by a flexible mechanism to absorb energy translated through the second set of upright members. The apparatus further includes a single/separated base member (108) connects to first and second upright members.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3632

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Francis Kepley, Jr. et al.

Francis Kepley, Jr. teaches the first and second set of upright members but fails to teach an elastic dampening device located in between the first and second upright members. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have added elastic washer between the first and second upright members to provide dampening for absorbing stress and force between the first and second upright members and to increase the life cycle for the first and second upright members.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Francis Kepley, Jr. et al. in view of US Patent # 1,855,964 to Higginbotham.

Francis Kepley, Jr. et al. teaches the apparatus but fails to teach a shelf. Higginbotham teaches the shelf (13). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have added shelf to Francis Kepley, Jr. et al.'s apparatus as taught by Higginbotham to provide additional storage on the apparatus for supporting presentation device.

Response to Arguments

Applicant's arguments with respect to claims 2-4 and 6-11 have been considered but are moot in view of the new ground(s) of rejection.
